Question <b>1</b> Correct	Given a string, s, consisting of alphabets and digits, find the frequency of each digit in the given string.
Marked out of 1.00	Input Format
F Flag question	
	The first line contains a string, <i>num</i> which is the given number.
	Constraints
	1 ≤ len(num) ≤ 1000
	All the elements of num are made of English alphabets and digits.
	Output Format
	Print ten space-separated integers in a single line denoting the frequency of each digit from 0 to 9.
	Sample Input 0
	a11472o5t6
	Sample Output 0
	Cample Galpat G
	0210111100
	Explanation 0

.

In the given string:

- · 1 occurs two times.
- . 2, 4, 5, 6 and 7 occur one time each.

The remaining digits 0, 3, 8 and 9 don't occur at all.

### Answer: (penalty regime: 0 %)

```
#include<stdio.h>
   #include<string.h>
   #include<ctype.h>
   int main()
5 + {
 6
        char s[1000];
        int arr[]={0,0,0,0,0,0,0,0,0,0,0};
        scanf("%s",s);
 9
        for(int i=0; i<strlen(s); i++)</pre>
10 +
11
            if(isdigit(s[i]))
12 •
13
                arr[s[i]-'0'] +=1;
14
15
16 +
        for(int i=0; i<10; i++){
17
         printf("%d ",arr[i]);
18
19
         return 0;
20
```

Question 2 Today, Monk went for a walk in a garden. There are many trees in the garden and each tree has an English alphabet on it. While Monk was walking, he noticed that all trees with vowels on it are not in good state. He decided to take care of them. So, he asked you to tell him the Correct Marked out of count of such trees in the garden. 1.00 Flag question Note: The following letters are vowels: 'A', 'E', 'I', 'O', 'U', 'a', 'e', 'i', 'o' and 'u'. Input: The first line consists of an integer T denoting the number of test cases. Each test case consists of only one string, each character of string denoting the alphabet (may be lowercase or uppercase) on a tree in the garden. Output: For each test case, print the count in a new line. Constraints: 1 ≤ T ≤ 10  $1 \le \text{length of string} \le 10^5$ SAMPLE INPUT 2 nBBZLaosnm **JHklsnZtTL** SAMPLE OUTPUT

Correct

1.00

**Output Format** 

Sample Input

abcd ef

characters are swapped.

You are given two strings, a and b, separated by a new line. Each string will consist of lower case Latin characters ('a'-'z'). In the first line print two space-separated integers, representing the length of **a** and **b** respectively. In the second line print the string produced by concatenating a and b (a + b). In the third line print two strings separated by a space, a' and b' are the same as a and b, respectively, except that their first

### Sample Output

4 2 abcdef

ebcd af

# Explanation

a = "abcd"

b = "ef"

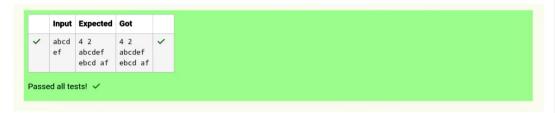

|a| = 4

|b| = 2 a + b = "abcdef"

a' = "ebcd"

b' = "af"

```
